BeeHelpful

designs, produces and sells

The definitive solution to the problem of honeybee mortality

The current honeybee crisis is devastating the agriculture economy worldwide. Honeybees are critical to human survival on our planet. Standard chemical based treatments and traditional techniques do not offer viable solutions.

The Primal Bee® System saves the Honeybees and provides:

- Healthier Colonies
- Less Parasites and Diseases
- Robustness to Climate Changes
- Self-selective Capabilities
- Better profitability

WHO CAN USE IT

- Professional pollination companies
- Honey Farms
- Hobbyists
- Organic beekeepers and enthusiasts
- Beginner beekeepers
- Orchard owners who now can easily manage their own hives with our simplified procedure, saving high pollination fees

PROVEN WINNING FEATURES

INCREASE

- + 200% honey production
- + 200% pollination capability
- +200% colony population

DECREASE

- 90% colonies losses
- 70% management costs
- 90% artificial feeding
